AND THE INSTITUTO DE SALUD CARLOS III

## MECHANISTIC AND INTEGRATIVE ASPECTS OF mRNA SYNTHESIS

BAEZA, SPAIN 1-3 OCTOBER 2007

### SCOPE

Biological complexity of eukaryotic organisms directly relates to multi-level control of gene transcription. Critical links between different steps in mRNA synthesis have been identified in recent years, stressing the importance of integrative approaches. Whereas new high-throughput technologies are providing data on protein interaction, mRNA expression and

transcription factor localization at a genomic level, detailed mechanistic studies continue to provide the framework to understand the observed patterns. This workshop will focus on the integration of genomic and biochemical approaches by bringing together experts from both fields in an effort to decipher the critical steps in eukaryotic mRNA synthesis.

### FORMAT OF THE WORKSHOP

The workshop will bring together 17 speakers and a maximum of 50 participants (including speakers). The scientific programme will start in the morning of Monday, October 1, and will end around noon on Wednesday, October 3. Ample time for informal discussion will be reserved. Participants will be invited to present a poster.

### VENUE OF THE WORKSHOP

The workshop will be held in Baeza, at the "Sede Antonio Machado", a XVIII century building turned into a Conference Centre of the Universidad Internacional de Andalucía (UNIA). This Seat includes a recently restored residence, where participants will be accommodated. Baeza is a World Historic Heritage town, renowned for its Renaissance and Gothic buildings.
